VIKING STONE

Norwegian Flagstone, Quarried for Generations

LIVE YOUR LIFE IN STONE

HERITAGE

Stone of the Vikings

Slate has shaped Norwegian architecture since the Viking Age, formed some 750 to 850 million years ago in the mountains of central Norway. Each slab carries that history — crafted by nature, and refined by generations of Norwegian craftsmen.

UNIQUE · DURABLE · SUSTAINABLE · AUTHENTIC

NORWEGIAN FLAGSTONE

LIVE YOUR LIFE IN STONE

ORIGIN

From Quarry to Slab

High in the Norwegian mountains, craftsmen extract natural quartzitic slate from ancient stone deposits — each slab beginning its journey among millions of years of geological history.

Generations of expertise and careful handling preserve the raw beauty and quiet strength of the Norwegian landscape in every piece.

PRECISION

Precision, Piece by Piece

Numbered pieces and detailed placement photos allow installations to move quickly and accurately, like assembling a custom-fit puzzle on site.

- **Thickness options**

Available in 5/8", 3/4", or 1"

- **Large-format patterns**

1–2 pieces per every 10 square feet

- **Medium-format patterns**

2–5 pieces per every 10 square feet

- **Assembly**

Each stone is pre-cut and numbered for precise, efficient placement

The Process

01

Precision Cutting

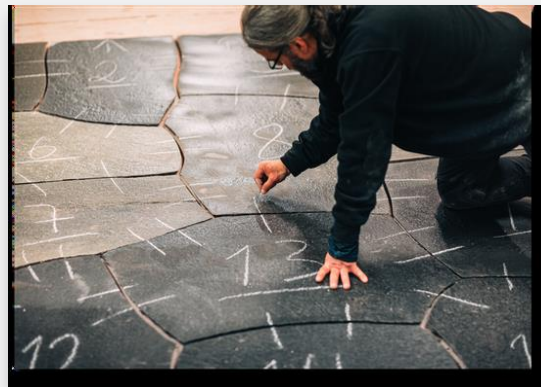

Cut to size with the stone scissor, preserving grain, thickness, natural consistency, and character.

02

Hand Selection

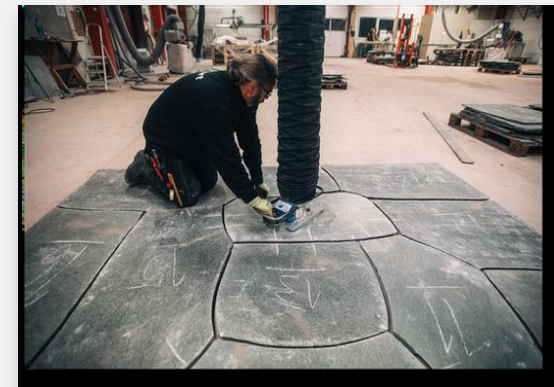

Each piece is hand-selected by craftsmen, then chalked, inspected for color and texture, and individually numbered.

03

Layout & Numbering

Pieces are carefully laid out and individually numbered to ensure a seamless installation.

04

Packaging & Delivery

Once complete, each slab is carefully packaged and prepared for transport to its final destination.

The Stone-Scissor Finish

The Stone Scissor is a specialized tool developed by craftsmen to achieve exceptional precision and control when working with natural stone. Each piece is carefully refined by hand to exact specifications, ensuring clean edges, a seamless installation, and preserving the unique character of every stone.

CARE

Built to Last, Easy to Keep

- Virtually maintenance-free — no sealers required outdoors
- For interior installations, a sealer can simplify upkeep
- Outdoors, an occasional rinse with water maintains its natural appearance

LIVE YOUR LIFE IN STONE

INSTALLATION

Installation Guidance

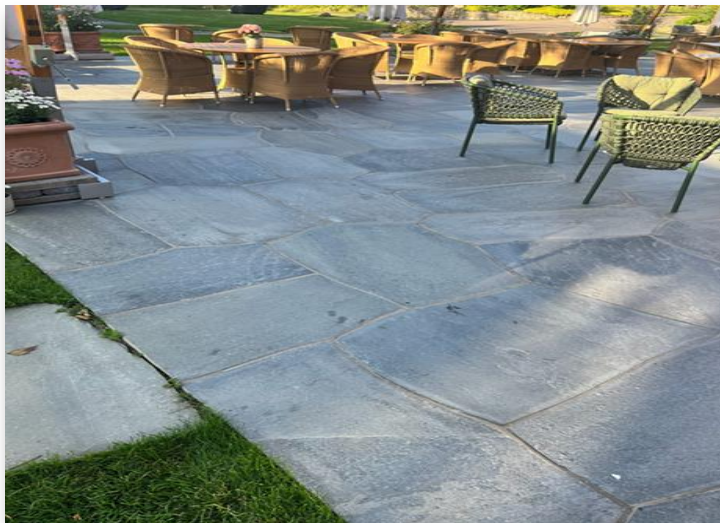

- Set with tile adhesive and grout formulated for natural slate
- For gravel or soil applications, joints can be filled with regular sand
- A growth-inhibiting grout is available to help minimize vegetation between stones

Three Collections, One Origin

Light Oppdal

A lighter, warmer palette with subtle striations — laid in Roman or Classic Straight patterns.

Dark Oppdal

Offered in Light and Dark tones, from a classic random pattern to a European rectangular bond.

Dovre

The most homogeneous color of the collection, with a tighter, contemporary expression.

COLLECTION

Light Oppdal Flagstone

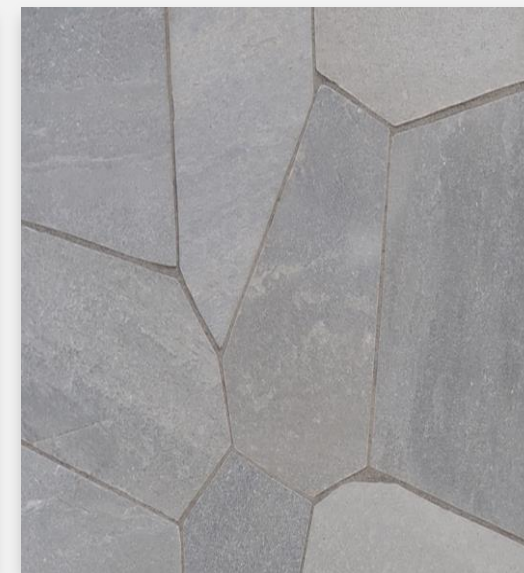

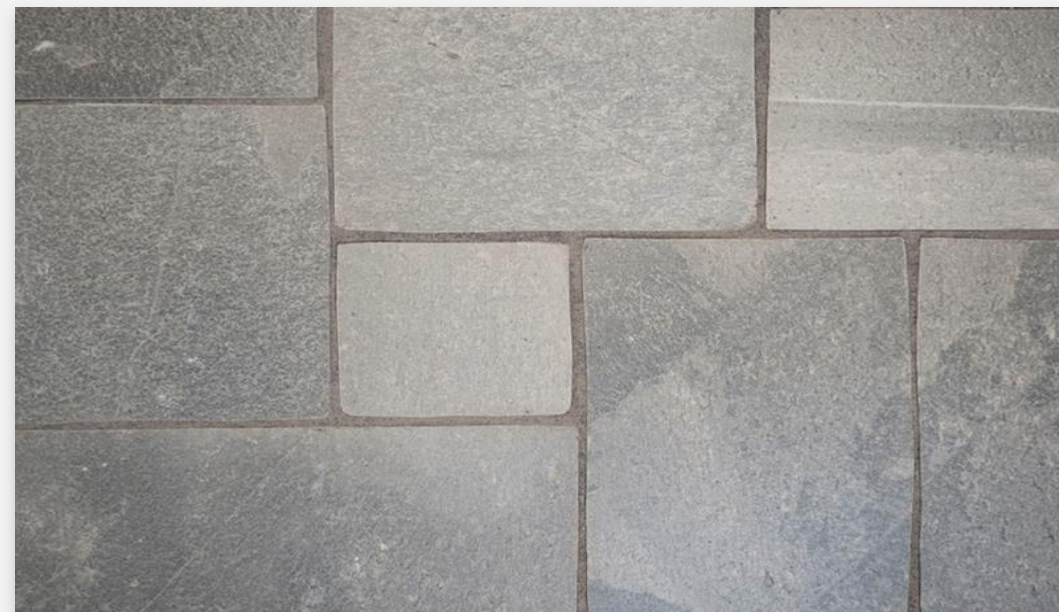

Roman pattern follows a traditional layout of straight lines, mixing rectangular and square flagstones in varying sizes. Classic Straight offers the same craftsmanship in a cleaner, more contemporary grid.

Each stone is cut by a skilled craftsman using the stone-scissor, ensuring precision and consistency in every piece.

AVAILABLE THICKNESS

1/2" (12 mm) • 3/4" (20 mm)

For installation on concrete foundations

COLLECTION

Oppdal Flagstone

Light and Dark tones, each available in three distinct laying patterns.

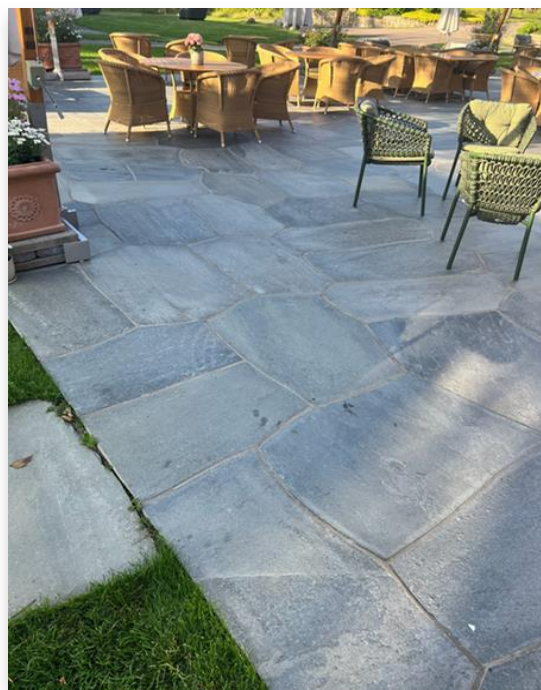

Light Oppdal

Open Joints on Gravel

Light Oppdal

European Rectangular Bond

Light Oppdal

Light Oppdal Classic Random Pattern

Dark Oppdal

Dark Oppdal Classic Random Pattern

COLLECTION

Dovre Flagstone

The most homogeneous color of the collection, with less variation in tone for a tighter expression that complements modern architecture.

Typically hand-chipped using the stone-scissor, with a natural finish and a maximum thickness of 1½".

THICKNESS BY SURFACE

7/8" (22 mm) — Gravel installation

5/8" (15 mm) — Concrete installation

LIVE YOUR LIFE IN STONE

Three Ways to Lay Viking Stone

Modern, traditional, and natural design aesthetics — offered across the Viking Stone collection.

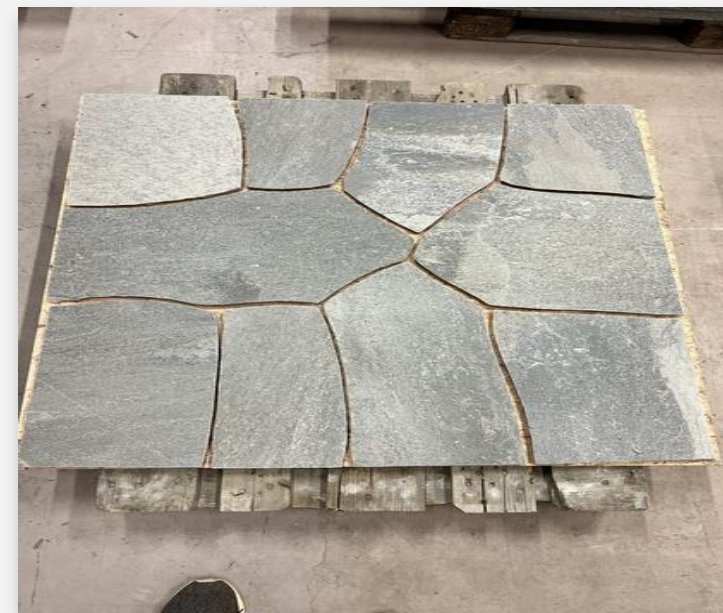

Roman Pattern

A modular arrangement combining multiple stone sizes.

Classic Straight

Clean, contemporary lines with a structured layout.

Dovre Flagstone — Natural Pattern

Natural, irregular shapes that create an organic appearance.
